

Raman Yachi Mathur

Japanese citizen w/ US work authorisation

+1 215-909-1925

ramanyachi@drexel.edu

EDUCATION

Drexel University, Pennsylvania

Sep '16 - June '20

BS Computer Engineering. Minor in Japanese

Recipient of A.J Drexel Scholarship

Club Soccer player, NIRSA Division Champs

Relevant Coursework:

ECE204: *Microcontrollers*, CS265: *Advanced Programming Techniques*, MATH221: *Discrete Math*, ECE201: *C Programming*, ECE200: *Digital Logic*, CS270: *Mathematical Foundations of Computer Science*

Woodstock School, India

August '14

Graduated with high honours. ACT w/ writing: 34/36

Varsity Soccer. AP Scholar with Distinction

RELEVANT EXPERIENCE

R&D Intern at Johnson Matthey | Clean Air, Pennsylvania

Sep '18 - April '19

- Developed novel engine control catalysts via fundamental research and tailored synthesis methods.
- Analysed data from myriad testing methods (XRF, IV Vis etc.) to determine catalysis efficiency and feasibility in scaling. Worked extensively with Excel Macros.
- Collaborated with scientists from the Americas, EU, Japan and India on internal and external projects.

Research Scholar at University of Sussex, UK

April '17 - Sep '17

- Studied perovskite solar cells, and how materials such as Zinc Oxide nanorods and graphene-oxide / graphene composites can be used to improve photoconversion efficiency.
- Researched methods of graphene synthesis and deposition that paved way for a novel perovskite solar cell architecture.
- Constructed and programmed an Arduino-controlled spin coater for solar cell fabrication under a vacuum.

Research assistant at NanoCrystal Research Lab, Pennsylvania

April '18 - Sep '18

- Investigated the efficiency and stability of All-Inorganic Halide Perovskites under Prof. Aaron T. Fafarman.

SKILLS

Languages: C, Python, MATLAB, \LaTeX , Arduino IDE, Processing

Technical: Microsoft Office, Creo Parametric, WindowsOS, MacOS, UNIX

Spoken Tongues: Native level fluency in Japanese, English and Hindi.
